

# Bitdefender Download and Installation for Windows

**Please note that Trinity has purchased a single license for each student, faculty and staff member allowing for installation on one device only.**

## Installing Bitdefender

For both convenience and efficiency, Trinity will email faculty and staff downloadable links for Windows, Macs and Linux computers. The email **From** and **Subject** lines will be like or similar to the image below (If you do not see this email in your **Inbox** check your **spam folders**.):

To download and install Bitdefender click on the link **Installer for Windows**.

### Installation

**Install Endpoint Security by Bitdefender**

Hello!

Your Network Administrator invites you to install **Bitdefender Endpoint Security Tools** on your computer. Click the link that corresponds to your operating system to download and run the installer.

[Installer for Windows](#)  
[Installer for Linux](#)  
[Installer for MAC](#)

**Endpoint Security by Bitdefender** unobtrusively protects any number of computers by using number-one-ranked antimalware technology combined with firewall, intrusion detection, web access control and filtering, sensitive data protection and application control. Employee productivity is ensured with low resource consumption, optimized system scanning and automated security that requires no end-user interaction.

The installation package is intended for **Trinity University** 's use only. Do not try to run it on devices that are not part of your company.

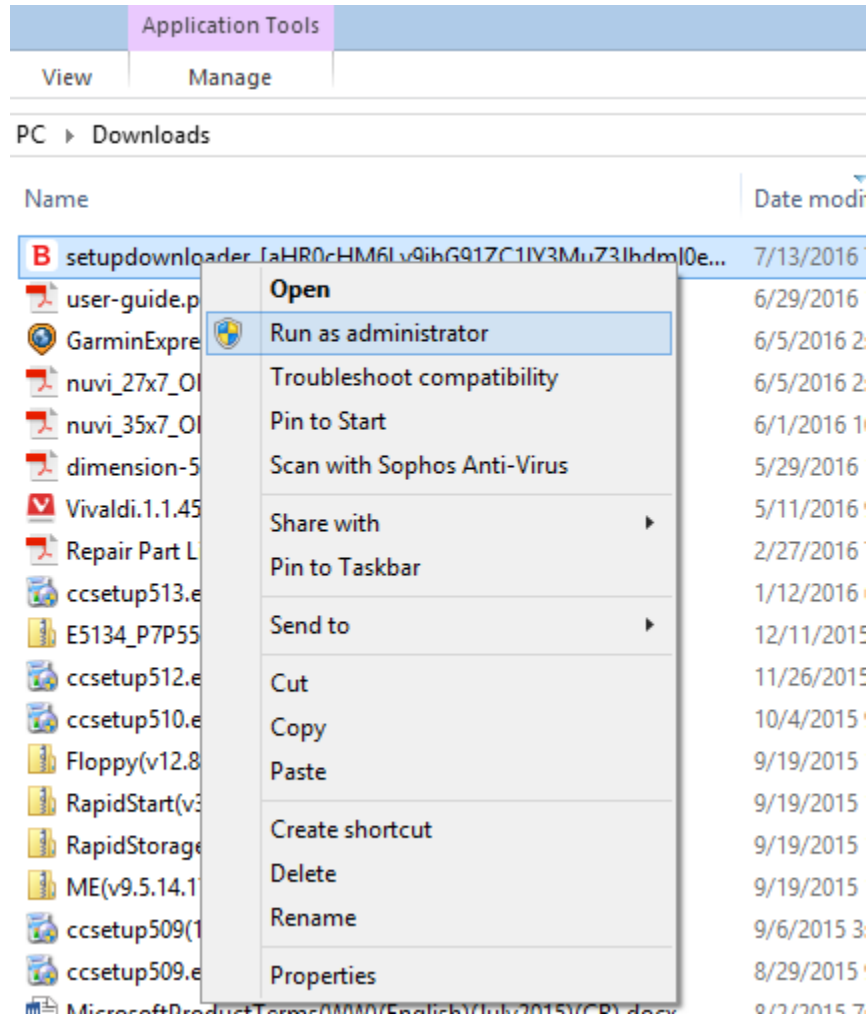

**We hope you enjoy using the #1-ranked security technology!**  
**Bitdefender** is the winner of the [AV-Test Best Performance 2014 Award](#) in the corporate solutions category.

Kind regards,  
Bitdefender Team

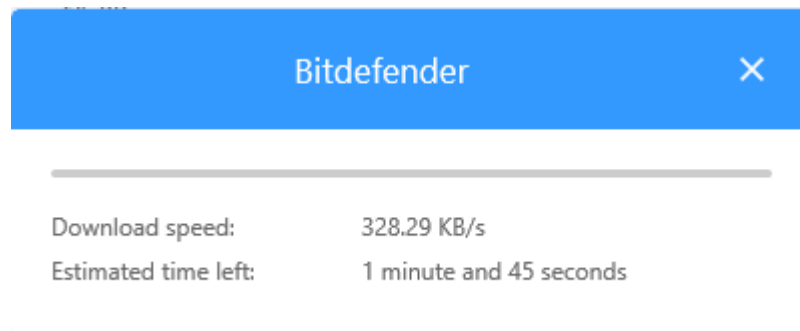

Please do not reply to this message. This is an automatically generated email.

Trinity recommends that you remove any currently installed antivirus and spyware removal programs prior to installing Bitdefender.

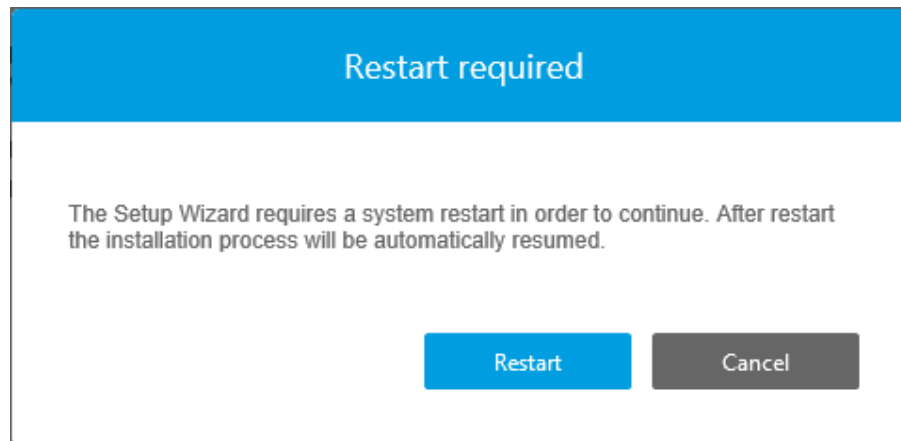

If you have finished downloading the installer link, open the **Downloads** folder, right-click on the Bitdefender **setupdownloader** file and select **Run as administrator**.

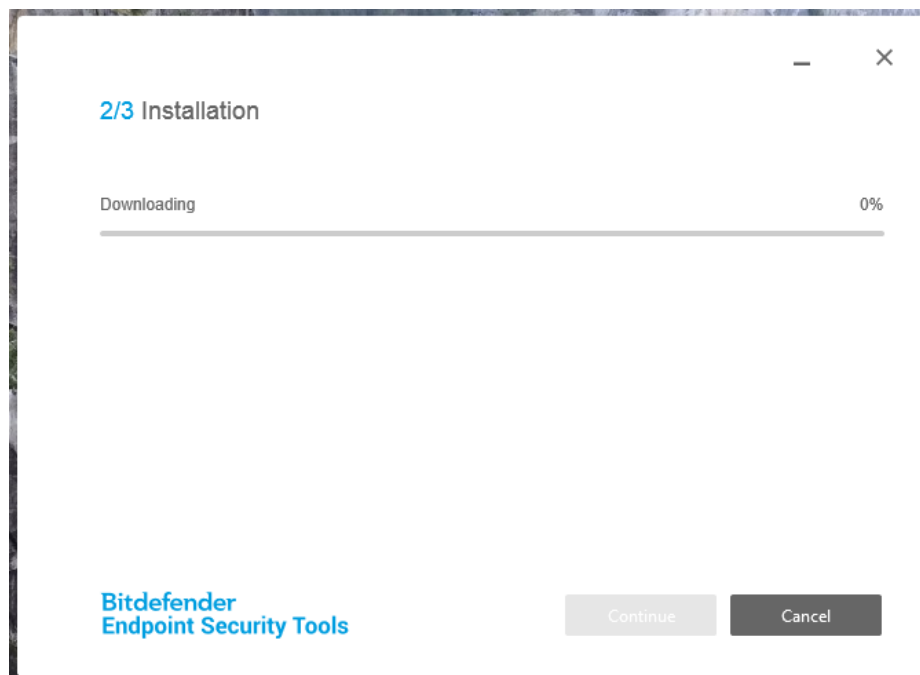

Bitdefender's install file will proceed to download additional installation files from our servers.

The Wizard will prompt for a restart. **Restart your computer to advance to the next stage of the install process.**

After system restart, the installer process downloads additional files – click **Continue** to advance.

Click **Finish** to complete the installation.
