

VMWare Horizon Client Installation Instructions for macOS

1. Download the VMware Horizon Client for macOS.
2. Once the .dmg file has downloaded, open it, and follow the prompts.
3. Copy over the VMware Horizon Client into the Applications folder by dragging the icon into the Applications folder. The installation dialogue will prompt you for this and also provide additional details.
4. Open the Applications folder.
5. Double click on VMware Horizon Client.
6. The first time the Horizon Client launches, you will be asked for a Connection server.
7. Type in the Connection Server name: vdi.trinity.edu
8. Click Connect.
9. Login with your TU Network credentials.
10. Click Login.
